How to Install styles

MacOS

Windows

MacOS

On a Mac use the following steps:

1. Close Capture One application.
2. Unzip downloaded file with styles and then right-clicking on the folder styles and choosing Copy from the edit menu, or by selecting the folder and pressing CMD + C.
3. Open a Finder window and then use the menu: *Go > Go To Folder* (or use SHIFT+CMD+G) and then type this path into the dialog, and click Go:
~/Library/Application Support/Capture One/Styles
4. Now you should paste the folder containing the Capture One styles that you copied into the current folder. You do this by either right-clicking and choosing Paste or by pressing CMD+V.
5. Start-up Capture One then go to the Styles & Presets tool, and you should see the styles organized in their own sub-folder.

On a Windows PC you should do the following steps:

1. Begin by closing Capture One if it is already running.
2. Next locate the C1 styles files you want to install. Remember, if they are in a zip-file, unzip them before continuing.
3. Select the folder containing the styles and copy them. You can press CTRL+C or right-click and select Copy.
4. Open a Windows Explorer window and navigate to the following directory:
C:\Users\yourusername\AppData\Local\CaptureOne\Styles50
(remember to replace your username with the name you use for logging into your Windows PC.
5. Press CTRL+V to paste the folder with the Capture One styles into the current folder.
6. Finally, relaunch Capture One and check if the installed styles are now organized into a separate folder in the Styles & Presets tool.
